Looking Ahead: 2025 Plans for R and Data Science

New directions and goals for the year

2025-01-01

Table of contents

As we start 2025, I'm excited to share some thoughts on where I'm heading with R programming, data science tools, and research computing workflows.

1 This Year's Focus Areas

Package Development: Planning to release two new R packages focusing on statistical visualization and research workflow automation.

Docker Integration: Expanding my containerization work to include more complex multi-service setups for data science teams.

AI-Assisted Coding: Exploring how LLMs can enhance R development workflows without replacing fundamental programming skills.

2 What's Coming to the Blog

You'll see more content in our new structure: - **Tutorials** on advanced R topics - **References** for quick command lookups
- **Guides** for solving specific problems - **Blog posts** like this for timely thoughts and updates

Looking forward to sharing the journey!
